

RETRACTABLE ROOF SYSTEMS

Oztech's range of architectural retractable roof and pergola systems offers versatile solutions for both residential and commercial applications. Whether it's a retractable roof system for your backyard or deck, or a custom roof system to meet the needs of a restaurant or commercial project, there is an OZTECH model to suit.

PRODUCT LINE UP

01 IZI

IZI is designed with versatility in mind, featuring a system without posts or gutters. It can seamlessly integrate into existing structures using special brackets or installation techniques. Reaching projections of up to 10m, the IZI system is a highly adaptable solution for various outdoor spaces.

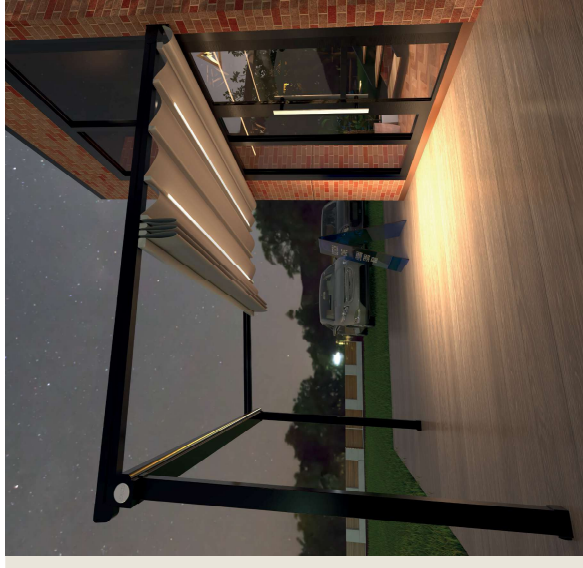

02 MUSE

The MUSE system is designed to minimize the traditional gutter (water drainage) system, offering a more streamlined look and more open view.

Additionally, the MUSE system can achieve a maximum projection of 5 meters and offers a more cost-effective solution without compromising on performance, making it an excellent choice for those seeking both value and style.

03 TERA

The TERA system is Ortech's best-selling retractable roof solution, providing versatile, year-round outdoor functionality with a maximum projection of 7m. Featuring a front gutter, it is available in standard, cantilever, freestanding, and plaza configurations, offering flexible options to meet diverse design needs. The TERA system is the ideal choice for creating stylish, functional outdoor spaces.

04 ARISTO

The Aristo system is designed to be most suitable for installation in wide and long spaces, with the ability to extend up to 10 meters. The profile is sturdily designed to ensure stable installation in such expansive spaces, without any bending.

PRODUCT LINE UP

05 HALO

The HALO system features curved rafters that create increased height and open up more space below, enhancing the sense of spaciousness. With patented aluminum bending technology, it optimizes curvature for superior structural stability and aesthetic appeal, offering a visually stunning and highly functional solution for projections up to 7m.

06 HARBOUR

The HARBOUR system is a freestanding, arch-shaped roof that elevates the center to create a sense of greater space. Its distinctive design not only maximizes area but also adds a unique atmosphere, making it a powerful marketing tool to enhance any space's appeal. Achieve up to 7m projections, or 10m with reinforced, thicker rafters.

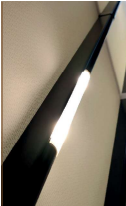

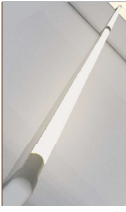

OPTIONS

INSTALLATION METHODS

CANTILEVER	FREESTANDING	PLAZA	CANTILEVER + PLAZA
------------	--------------	-------	--------------------

OPTIONAL EXTRAS

LED LIGHTING	MANUAL SWITCH
uni LED  maxi LED 	OPTION Light Intensity 4000-5000k Light Colour Natural White A switch button will be attached directly to the product, in which the buttons will allow the users to manually control the operation of the product by pressing on it.

WIND SENSOR

A wind sensor can be paired to motor, allowing the roof system to automatically retract back in when a certain wind speed is detected by the sensor.

SUN & WIND SENSOR

This allows for an automated opening and closing of the roof based on the intensity of light detected by the sun sensor and based on the speed detected by the wind sensor.

SMART HOME HUBS

Frame colours are available in any colour within the Dulux Dullaroy range. Fabric support bars and end caps are standard white but fabric bars may be powder coated to colour of choice for an extra charge.

Additional products for side coverings

Outdoor Blinds

GENIUS

An elegant outdoor blind system inspired by European design, featuring a rounded headbox and capable of spanning up to 5 meters with a single screen.

TRU SCREEN

A traditional outdoor blind design favored by many Australians, featuring sharp edges and a rectangular headbox that seamlessly integrates into any home without disrupting visual harmony.

Infills

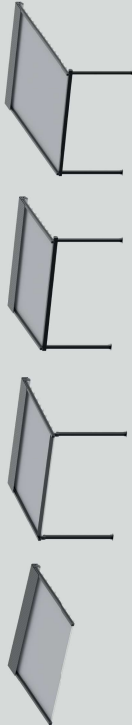

The triangular opening that is exposed on the sides of the roof systems may be covered using a fabric infill. Mesh or PVC fabric is generally used.
